## **Environment and Energy Policy (Green Policy)**

### **1. Policy Statement**

Environment and Energy Policy (Green Policy) aims to address environmental and energy related issues in the campus. The policy deals with protection and preservation of natural resources and ecosystem as well as prevention of pollution and other environmental issues. It also aims to promote development and use of reliable, affordable and sustainable energy resources. This includes tapping of clean and renewable energy namely, solar power. This policy essentially defines eco-friendly culture, ethics and lifestyle among staff and students.

### **2. Objectives of the Policy**

- To encourage use of environment friendly products and avoid items harmful to the environment.
- To create environmental awareness by organizing campaigns, seminars, workshops, presentations and competitions.

### **3. Energy Conservation and Green Campus Practices**

- KJCMT has installed solar power facility as part of promoting use of renewable energy.
- College has implemented the practice of replacing all tube lights with LED tubes, in tune with the policy on energy conservation.
- Staff and students are instructed to switch off lights, fans and other electrical gadgets as and when not in use, to spread the message of energy conservation.
- College maintains a clean and green campus in accordance with Green Campus Policy.
- Instruction has been given to the staff and the students to avoid use of plastic within the campus.
- Tri-colour bins have been placed in the campus for segregating biodegradable, non-biodegradable and recyclable waste.
- Annual energy audit is made mandatory.
